

CLAW 206 is a biodegradable blend made from a new generation of environmentally friendly surfactants.

### Typical Characteristics

| Parameter                                    | Specification       |
|----------------------------------------------|---------------------|
| Appearance                                   | Clear yellow liquid |
| Specific gravity @ 20°C (g/cm <sup>3</sup> ) | 1.00 – 1.10         |
| Solubility in water                          | Soluble             |
| Flash point, closed cup (°C)                 | > 100               |

### Application

- Used as a drilling fluid detergent, acting as a spacer in freshwater and seawater applications
- Emulsifies oil-based and synthetic-based mud systems, preventing oil-wet solids from being redeposited onto the surface of pipelines
- Removes drilling fluid and crude oil residues from casings, piping and surface equipment

### Packaging and Storage

CLAW 206 is packaged in 210 kg drum.

Store in dry, well-ventilated area. Keep container closed. Keep away from heat, sparks and flames. Store away from incompatibles. Follow safe warehousing practices regarding palletizing, banding, shrink-wrapping and/or stacking.

### Recommended Handling

All personnel handling this material must handle it as an industrial chemical, wearing protective equipment and observing the precautions as described in the Safety Data Sheet (SDS).

This document is supplied solely for informational purposes and Solent Chemicals makes no guarantees or warranties, either expressed or implied, with respect to the accuracy and use of this data. All product warranties and guarantees shall be governed by the Standard Terms of Sale.
